

equipment solutions

Paterson Dental's offering wouldn't be complete without a comprehensive range of general equipment that matched the quality of its cabinetry. Thanks to our exclusive UK distribution agreements with world-class equipment manufacturers, we can offer an outstanding choice of stylish, high quality dental operating equipment and complementary ancillary products.

Surgery

The dental chair is the centrepiece of any surgery, and a major part of the patient experience. That's why we've worked hard to develop a strong relationship with superior brands like Midmark - the leading dental and medical equipment company in the US- and Belmont. In addition, through Midmark's digital imaging arm, Progeny, and our partnership with Acteon, we are also able to offer a full Digital Imaging portfolio.

Sterilisation

Our comprehensive range of sterilisation equipment includes everything from washer disinfectors and autoclaves, to magnifying lights and bag wrappers. There are several options to choose from in each range, but all meet the rigorous quality standards that define Paterson Dental. With innovative solutions to help you meet new requirements, we are well placed to help you achieve HTM 01-05 Best Practice.

Plant room equipment

We believe in providing equipment that is fit for purpose and that will stand the test of time. With years of experience in planning and delivering dental solutions, and in after-sales care supporting our customers, we have partnered with Durr and Cattani to provide pumps and compressors to meet all requirements. We can also offer a free equipment check to ensure your existing equipment meets current guidelines and legislation.

your practice made perfect

Installation and training

Our expert technicians ensure that all equipment is properly installed and seamlessly linked in to your existing systems. Our specialist consultants are also on hand to demonstrate the products in person, and to provide all the training you need in order to get the most from your equipment.

Service and support

We place huge importance on the quality of our after-sales service. So, as well as being on hand to answer your queries, our in-house technical support team, web-based helpdesk and fully-trained equipment engineers are also there to ensure that any service or repair downtime associated with your equipment is kept to an absolute minimum.

Partners

Paterson Dental are the sole UK distributor for Midmark and have also partnered with other leading brands in order to bring you a fully comprehensive range of dental equipment.
